DETAILED ACTION

Claim Objections

1. Claim 7 is objected to because of the following informalities: Claim 7 contains the word "inorganiz" which is a typographical error. Appropriate correction is required.

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 7-11 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

There is no antecedent basis for "the inorganic peroxide" in line 7 of claim 7.

Dependent claims fall herewith.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claim 29 is rejected under 35 U.S.C. 102(b) as being anticipated by Chang et al. (5981447).

Chang teaches a wellbore fluid which comprises a HEC polymer and an encapsulated calcium peroxide (see column 18, lines 5-35).

6. Claims 29 and 30 are rejected under 35 U.S.C. 102(b) as being anticipated by Dawson (5624886).

Dawson teaches a wellbore fluid fracturing fluid which comprises a polymer such as a guar, and a calcium, magnesium or zinc peroxide which is at least partially encapsulated by sodium silicate (see table in column 5).

7. Claims 12-18, 21-25 and 41-49 are allowable over the art of record.

8. Applicants arguments have been noted, but are not fully persuasive. Claims 29 and 30 did not contain all the limitations of the claim from which it depended (claims 14, 15 and 16), which incorporated the teaching of a film forming and enteric polymer, which is substantially insoluble at pH levels greater than about 7.5. The claims are thus still rejected in view of Dawson and Chang. A new rejection under 35 USC 112 is made in view of the amendment to claim 7.

9. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
